

Our Guarantee to You

Advanced Bone Support Program*

Bone Restore* Advanced (Plant Calcium) + **Bone Restore* Max** (Strontium Citrate) will increase bone density in **6 Months** or **you will receive 100% of your money back!***†

Stone Oak Women's Center is so confident in our **Advanced Bone Support Program*** that we are offering a **100% Money Back Guarantee.**† The research, clinical studies and results completed allow us to offer a guarantee that no other company offers.

Program Steps Required for Guarantee:

1. Take a hip and spine DEXA Scan (baseline; to be taken no more than 30 days before you begin this program).
2. Take the labeled dosage of Bone Restore* Advanced and Bone Restore* Max daily for 6 months.
3. Take a second hip and spine DEXA scan at the same clinic as the first one (to be taken no more than 30 days after completion of this Program).

If your DEXA scan results do not show an increase of bone density in either your hip, femoral neck and/or spine after using this program for 6 months, please fill out the Reimbursement Application Form.†

OUR GUARANTEE DOES NOT APPLY TO THE FOLLOWING SITUATIONS:

1. **Prescription Drug Use** - Any prescription drug can lead to increased bone loss.
2. **Bisphosphonate Drug Use (such as Fosamax, Actonel, Boniva, etc.)** - Stopping use after a period of several months results in poor quality bone which needs to be replaced requiring additional time. If you start this program, the first 6 months may be dedicated to replacing the poor bone before building regular bone mass.
3. **Early Stage Menopause** - If you are in the first five years of menopause, your hormone balance may cause a dramatic drop in bone density. While powerful, the Bone Restore* Advanced program may not be able to offset the loss. Women in this phase of life are excepted from the Guarantee. **IMPORTANT NOTE:** Even if you fall into one of the guarantee exceptions, the Bone Restore* Advanced program is still recommended. If you are taking medications or are in early menopause, you need every nutritional advantage available.
4. **DEXA Scan** - The first hip and spine DEXA scan ("baseline") must be done no more than 30 days prior to starting this program. The second follow up DEXA scan must be done at the same clinic as your first scan and no later than 30 days after 6 months of following this Program.

In each of the above circumstances, the Advanced Bone Support Program is still highly recommended as it may reduce bone loss, or may even increase bone density.* Your bones need the support blocks in **Bone Restore* Advanced** and **Bone Restore* Max** – perhaps even more than individuals whose bones are not affected by medications.**

†All documents to be provided to Stone Oak Women's Center; any guarantee payment reimbursement will also be provided via Stone Oak Women's Center. Only documented amounts paid for six months' worth of formulas will be reimbursed via Stone Oak Women's Center; cost of DEXA scans and/or doctor's visits will not be reimbursed. An increase in any one or more of the following areas is considered a success on the program and is not eligible for claim reimbursement: Hip, femoral neck, spine. Submitting a claim disqualifies the patient from any further program refunds.
